EDUCATION

B.Tech — AI & Data Science
Sri Krishna College of Engineering and Technology
2024 – 2028
CGPA: 8.16 / 10

Higher Secondary (12th)
SSVM Vidhan Matric HSS
2023 – 2024 | 91.67%

SKILLS

Languages
Python • SQL • Java
C++ • JavaScript

AI / ML
Machine Learning • NLP • RAG
LLMs • Generative AI
Explainable AI • scikit-learn

Backend & Web
FastAPI • REST APIs
React.js • HTML5 • CSS3

Databases
MongoDB • MySQL • Supabase

Tools
Git • GitHub • VS Code
Google Colab • Streamlit

CS Concepts
DSA • OOP • OS
System Design

CERTIFICATIONS

NPTEL Elite — Applied AI
IIT Guwahati | 2026

NPTEL Elite — Python
IIT Madras | 2025

CAREER SUMMARY

B.Tech AI & Data Science undergraduate (Batch 2028, CGPA: 8.16) building machine learning and generative AI systems in Python, from risk scoring and attack forecasting to retrieval-augmented question answering, with explainability and dashboards for end users. Skilled in scikit-learn, NLP, RAG, FastAPI, and Streamlit, with strong foundations in data structures and algorithms (195+ LeetCode problems solved). Two-time NPTEL Elite achiever and national hackathon finalist.

PROJECTS

DisputeGuard AI — Merchant Chargeback Defense

Python • FastAPI • Streamlit • scikit-learn | *Razorpay AI Buildathon*

- Built a prototype that generates synthetic dispute data for 100 historical cases, extracts evidence from customer chats and courier logs, and scores risk with a logistic regression model behind a financial safety gate.
- Automated PDF dispute-packet generation and delivered a Streamlit review dashboard with manual override and a FastAPI backend for case inspection.

AI-Based Network Attack Forecasting

Python • Streamlit • Machine Learning | *Independent Project*

- Built a Streamlit dashboard that forecasts network attacks from flow and packet-level features using a trained world model, with CSV upload.
- Mapped predictions to MITRE ATT&CK stages, with response recommendations and explainability output.

Local Laws Teller — AI Legal Assistant

React.js • FastAPI • RAG | *Independent Project*

- Engineered a full-stack legal assistant enabling natural language queries over Indian legal text with a RAG pipeline.
- Served ML inference, structured data retrieval, and vector search through FastAPI REST APIs, designed for offline, low-resource devices and rural accessibility.

ACHIEVEMENTS

- Finalist, Infinity AI Hackathon — Tredence & Databricks, Bangalore (2025): built a working prototype in a 24-hour live national round.
- Prince iSOLVE Hack'26, Chennai (national level, 2026): built a complete solution in 12 hours spanning IoT, Smart Cities, and Healthcare.
- LeetCode: 195+ solved (110+ Medium, 20 Hard) | 100 Days Badge 2026.
- Certified in Generative AI Basics (IBM / Coursera, 2025) and Explainable AI (Infosys, 2026).
- Completed a virtual ML internship at CodSoft (20 May – 20 Jun 2026): movie genre classification, credit card fraud detection, and customer churn prediction, evaluated with ROC curves, confusion matrices, and feature importance.
