EDUCATION

B.Tech — AI & Data Science
Sri Krishna College of Engineering and Technology
2024 – 2028
CGPA: 8.16 / 10

Higher Secondary (12th)
SSVM Vidhan Matric HSS
2023 – 2024 | 91.67%

SKILLS

Languages
Python • Java • JavaScript
TypeScript • SQL • C++

Frontend
React.js • HTML5 • CSS3
Three.js • WebGL

Backend
Spring Boot • FastAPI
REST APIs • Node.js

Databases
MongoDB • MySQL • Supabase

AI / ML
Machine Learning • RAG
LLMs • Generative AI
Explainable AI • NLP

Tools
Git • GitHub • VS Code
Google Colab • Postman
Streamlit

CS Concepts
DSA • OOP • OS
System Design

CAREER SUMMARY

B.Tech AI & Data Science undergraduate (Batch 2028, CGPA: 8.16) with hands-on experience in full-stack engineering, REST API design, and ML system integration. Skilled in Java, Python, React.js, Spring Boot, and FastAPI, with strong foundations in data structures, algorithms, and object-oriented design, backed by 195+ LeetCode problems solved. Two-time NPTEL Elite achiever and national hackathon finalist who ships end-to-end web applications and machine learning pipelines under tight deadlines.

PROJECTS

DevPulse — Developer Productivity & Repository Management Platform

Spring Boot • React • MySQL | *Academic Project*

- Built a full-stack platform with a React 19 + Ant Design dashboard on a Java 17 / Spring Boot 3.2 REST API to manage repositories, commits, issues, and pull requests in one place.
- Implemented JWT authentication (Spring Security, BCrypt), role-based access, pull request workflows, productivity scoring, reports, and Swagger/OpenAPI docs.

CodeSync — Real-Time Collaborative Coding Platform

React • TypeScript • Spring Boot • Supabase • Judge0 | *Independent Project*

- Built a collaborative coding platform with live multi-user editing (Yjs, Monaco, WebSockets), authentication, a 16-problem bank, REST APIs, and submission history.
- Integrated Judge0 for sandboxed code execution with a per-language test harness, and verified features through browser-based testing.

Local Laws Teller — AI Legal Assistant

React.js • FastAPI • RAG | *Independent Project*

- Engineered a full-stack legal assistant enabling natural language queries over Indian legal text with a RAG pipeline.
- Served ML inference, structured data retrieval, and vector search through FastAPI REST APIs, designed for offline, low-resource devices and rural accessibility.

DisputeGuard AI — Merchant Chargeback Defense

Python • FastAPI • Streamlit • scikit-learn | *Razorpay AI Buildathon*

- Built a prototype that generates synthetic dispute data for 100 historical cases, extracts evidence from customer chats and courier logs, and scores risk with a logistic regression model behind a financial safety gate.
- Automated PDF dispute-packet generation and delivered a Streamlit review dashboard with manual override and a FastAPI backend for case inspection.

CERTIFICATIONS

NPTEL Elite — Applied AI
IIT Guwahati | 2026

NPTEL Elite — Python
IIT Madras | 2025

Introduction to Deep Learning
Infosys Springboard | 2026

Explainable AI
Infosys Springboard | 2026

Python for Data Science and Machine Learning Bootcamp
Udemy | 2026

Machine Learning Fundamentals
Infosys Springboard | 2025

Generative AI: Prompt Engineering Basics
IBM / Coursera | 2025

Data Structures and Algorithms
Infosys Springboard | 2025

Java 11 Essentials
Infosys Springboard | 2025

Python Programming Fundamentals
Microsoft / Coursera | 2025

AI-Based Network Attack Forecasting

Python • Streamlit • Machine Learning | *Independent Project*

- Built a Streamlit dashboard that forecasts network attacks from flow and packet-level features using a trained world model, with CSV upload.
- Mapped predictions to MITRE ATT&CK stages, with response recommendations and explainability output.

Medical Visualization Platform — 3D Imaging

Three.js • WebGL • MediaPipe | *Independent Project*

- Converted DICOM/NIfTI imaging data into interactive 3D models with gesture and voice control.
- Designed for real-world deployment constraints, including offline and low-resource device compatibility.

HACKATHONS

AI Hackathon Finalist

Infinity AI Hackathon — Tredence & Databricks, Bangalore | *2025*

- Selected among top teams nationally to compete in a 24-hour live AI innovation challenge at Tredence's Bangalore office — built and shipped a complete working prototype under competitive conditions.
- Demonstrated rapid prototyping, teamwork, and architectural decision-making under time pressure.

National Hackathon Participant

Prince iSOLVE Hack'26, Chennai | National Level | *2026*

- Engineered a complete technical solution in a 12-hour national hackathon addressing IoT, Smart Cities, and Healthcare domains.

ACHIEVEMENTS

- NPTEL Elite Certificate — Applied Accelerated Artificial Intelligence (IIT Guwahati, 12-week, Jul–Oct 2026) — 78% consolidated score.
- NPTEL Elite Certificate — The Joy of Computing using Python (IIT Madras, 12-week, Jul–Oct 2025) — awarded to top performers nationally.
- LeetCode: 195+ solved (110+ Medium, 20 Hard) | 100 Days Badge 2026.
- ISRO Remote Sensing Data Analytics (IIRS, 2025) — Grade A+, 100% attendance.
- KRIYA 2025 — TaskOps technical event at PSG College of Technology, one of Tamil Nadu’s premier engineering institutions.
- Virtual ML Internship (CodSoft): Completed 4-week task series on movie genre classification, fraud detection, and churn modeling.
